Description

It provides Mobile Kitchen's water need by being under the vehicle. It is isolated with 30 mm isolation between double stainless steel sheet metal against the possibility of freezing in cold weathers. In order to prevent vibration during the transportation, clean and waste water tanks have been departmentalized with jetty. There is an indicator that indicates the amount of water in it. Through the agency of hydrophore system, the water is given to all points that need water. It can be projected to be fed from external water supply.
